DETAILED ACTION

Applicant's amendments and remarks, filed 11/28/05, are acknowledged. Amended claims 58, 69, and 71; new claims 72-74; and cancelled claims 59-68 and 70 are acknowledged.

Applicant's arguments, filed 11/28/05, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from the previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 58, 69, and 71-74 are herein under examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

NEW MATTER REJECTION

Claims 58, 69, and 71-74 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This rejection is necessitated by amendment.

Applicants point to various sections of the specification for written support in the amended and new claims. There does not appear to be adequate written support for “at least seven cell surface marker antigens” on lines 8-9 and 11 of amended claim 58. The specification on page 35, lines 15-17, recites “about 7 to about 1000 and more preferably from about 10 to about 1000” which does not provide written support for “at least seven” which is broader in scope. Also, the passages cited by Applicants do not mention “polyclonal antibodies”, as recited in new claim 74. Because the introduction of “at least seven cell surface marker antigens” and “polyclonal antibodies” do not appear to have written support, these phrases are considered to be NEW MATTER. Claims 69 and 71-73 are also rejected due to their dependency from amended claim 58.

Conclusion

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
